

Diamond Grill Pans

Cook steaks, chicken, seafood with impressive grill marks!

You can now use your oven to cook delicious meats with impressive grill marks. The pan is pre-heated and the bold, diamond grill pattern is seared right onto the surface of the protein as it cooks.

- Easy grip rim for safe handling
- One piece construction from heavy 12 gauge aluminum
- PSTK permanent easy release coating
- Oven safe to 700° F
- Custom sizes available for commercial use. Please contact sales

Oven Recommendations:

Pan should never be oiled. Oil proteins instead. Wipe off residue and oil between bakes.

Conveyor Ovens

Pre-heat dry pan with either a half or full pass. Lightly oil proteins, if needed. Quickly return pan to the loading position and press proteins firmly onto hot pan to start the sear. Cook as desired. Turning half way is not necessary. Serve marked side up.

Speed Bake Ovens

Pre-heat dry pan to 450°–500° F. Lightly oil proteins, if needed. Quickly press proteins firmly onto hot pan to start the sear. Cook as desired. Turning half way is optional.

Conventional Ovens

Pre-heat dry pan to 550°–600° F. Lightly oil proteins, if needed. Quickly press proteins firmly onto hot pan to start the sear. Bake approximately 3/4 minutes on each side, depending on type and thickness of protein.
