

# Dura-Kote™

The DK release coating makes depanning easier, is metal utensil safe and permanent.

Combining our in-house anodizing processes with our proprietary water-based release coatings, our pans require less time to maintain, last longer, cook better and are easy to clean up.

The LloydPans exclusive release finishes are created by applying several coats of our liquid sealer followed by bake time in an industrial oven. The sealer is actually absorbed into the pores of the anodized finish and only requires an initial wash before use. The result eliminates the need for messy pre-seasoning, and provides a durable and long lasting product.

Every step of the manufacturing and coating process is conducted entirely in-house at our facility in Spokane Valley, Washington.

## Dura-Kote

- Our most durable, longest lasting finish
- Dark finish results in faster baking
- Type III Hard Coat Anodizing
- Proprietary Easy Release Coating
- Metal Utensil Safe
- Minimal Oiling and Easy Cleaning

## Only from LloydPans

- **Permanent Coating**  
Will not chip, peel or flake off
- **Metal Utensil Safe**  
For many operations
- **Durable for Production**  
Lasts for years of baking
- **Reduced Oiling**  
Permanent easy release
- **Easy To Clean**  
Saves time and labor
