

BOH Series Flameless Cooking Induction Cabinets

Optimize your back-of-house operation with the power of induction – our BOH Series Flameless Cooking Induction Cabinets offer cleaner, more efficient & safer cooking, prepping, and warming in a compact, stainless-steel cart designed for commercial settings.

Highlights:

- Expertly welded in the USA, premium stainless steel cabinets with fully-sealed welds to reduce harboring of food particles and bacteria
- Independently operated zones with drop-in induction ranges allows for ranges to easily be removed, repaired, or replaced - no technician required, zero service calls
- Powered by Spring USA MAX Induction from 1800W - 3500W for an energy-efficient alternative to traditional gas or electric
- Built to industry-standard sizes so you can easily slide-in to replace traditional stoves and ranges

Backed by the Power of Spring USA

Spring USA's line of induction ranges are guaranteed durable and reliable. Each and every range is expertly crafted to meet rigorous testing and performance standards. We don't just guarantee it, we prove it with a **less than 1% failure rate** backed by an **overnight exchange warranty**.

4-Zone BOH Series Induction Cabinets

6-Zone BOH Series Induction Cabinets

FEATURES |

Energy-Efficient, Flameless Heat

Safe and more efficient than gas or electric stovetops, induction is 94% efficient in delivering energy to the pan - as compared to traditional gas (35%) and electric cooking units (50%). Greater energy transfer results in less emitted heat, greater utilization of energy, and reduction of fuel usage - all translating to savings and convenience for back-of-house settings.

Our induction units utilize exclusive SmartScan® technology for more precise heating and responsiveness for extra-fast boiling and scorch/ burn-free cooking.

Easy Installation & Maintenance

Drop-in induction units are individually mounted and operated for easy maintenance or repair/ replacement with our one-year, overnight exchange warranty. Each cart is designed to accommodate Spring USA drop-in units from 650W - 3500W.

Durable, Commercial Construction

Constructed of commercial-grade stainless steel, our BOH Series induction cabinets are made to withstand the rigors of BOH environments. A durable, 5" stainless-steel backsplash is mounted to the back of the cabinet to keep area clean from food splatter and make clean-up easy.

Designed to industry-standard sizes means these induction cabinets can easily slide-in to replace traditional cooking appliances without having to reconfigure your BOH set-up.
