

# Coating Options from LloydPans®

LloydPans bakeware finishes are created by combining our in-house anodizing processes with our coating options. The result provides the best possible product with the attributes of the coating chosen.

LloydPans offers 3 types of standard coatings, and 2 additional custom coatings, that are approved for baking food items in ovens. Powder coating is for display and service, not for baking.

## Pre-Seasoned Tuff-Kote®

**Dark Finish PSTK** Same attributes as Dura-Kote®.

- **Superior Finish for the Pizza Industry**  
Proven by top franchises and pizza experts.
- **No Pre-Seasoning Required** Ready for production.
- **Produces Excellent Crust** Consistent, even baking.
- **Permanent Stick-Resistance** Will not chip, peel or flake.
- **Easy to Clean**

## Dura-Kote® Dark Finish

**Dark Finish Bakes Hotter and Faster**

- **Durable** Built to withstand countless baking cycles.
- **Metal Utensil Safe** Will not chip, peel or flake off.
- **Reduced Oiling** Easy release finish is stick resistant.
- **Easy to Clean**

## Silver-Kote® Light Finish

**Bakes Similar to Bare Aluminum**

- **Eliminate Reglazing**  
Unlike silicone, this durable permanent release coating will last through countless baking cycles with proper care.
- **Reduce Release Aids and Parchment Paper**  
The easy release surface requires minimal oiling and often eliminates the need for parchment paper.
- **Steam-Proof Finish**  
Steam and moisture penetration will not degrade the finish so depanning can occur on your schedule. Safe to soak in water.
- **Non-Reactive**  
Neutral, non-toxic finish does not discolor products containing eggs, like cheesecake.  
Water based release finish is PTFE and PFOA free.
- **No Peeling, Flaking or Chipping**  
The release layer is infused into the surface of the pan to create a long lasting, durable finish.

## Silicone Glaze Non-Stick

**Excellent Release** For the Bakery Industry

- **Non-Stick Surface**  
Provides very good release for a reasonable number of baking cycles.
- **Semi-Permanent**  
Coating does degrade with use and is susceptible to damage from steam or soaking in water.
- **Re-Coating**  
Recommended services are available to clean & re-coat products. LloydPans does not offer this service.

## PTFE Non-Stick

**Commonly Used in Foodservice**

- **Non-Stick Surface**  
Provides good release suitable for baking temperatures
- **Semi-Permanent**  
Coating degrades with use and susceptible to scratching and flaking if not used and stored properly.
- **Non-Metal Utensils**  
Wooden, plastic or silicone utensils are best for use.

## Powder Coat Colored Finish

**Not suitable for baking.**

- **Durable Surface**  
The highly durable surface protects from corrosion and is resistant to chipping and flaking.
- **Solvent-Free Coating**  
Applied with no solvents and releases minimal Volatile Organic Compounds. An environmentally sound choice for colored parts.
- **Display and Service Only**  
This coating is not applicable for baking
