

Hex Disks

Superior alternatives to mesh screens

Finished with LloydPans exclusive PSTK coating

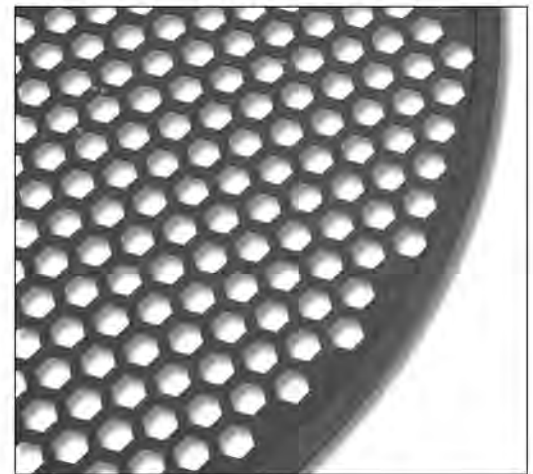

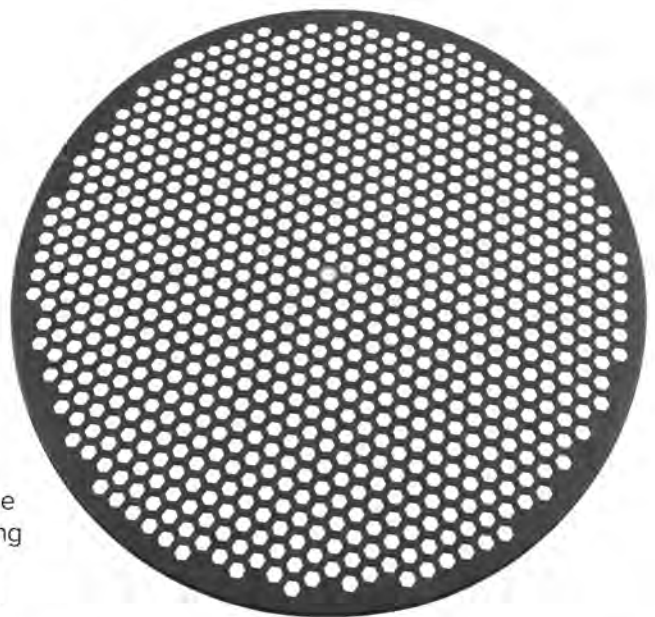

- Hard coat anodized 18-gauge (.040") aluminum
- No seasoning required and ready to go out of the box
- Permanent finish will not chip, bake, flake or peel off... ever
- Durable: outlasts and outperforms screens
- flat rim for added strength and easier removal with peels
- 50% airflow to 50% surface ratio

Maximum Airflow

The Hex Quik-Disk has the most airflow of all our disks due to the unique hexagonal shape of the perforation. This six-sided opening allows the holes to be positioned closely allowing the maximum exposure to the heat of the oven while still maintaining strength. The folded rim also adds strength to the disk and creates an easy edge for peels to get underneath.

Cleaning & Maintenance:

1. No seasoning is needed before use.
2. Do not wash in dishwasher. Before first use, wash by hand with a liquid dish soap and non-abrasive, non-metal scrubber.
3. Wipe with small amount of oil before first use. Subsequent oiling should not be necessary.
4. Remove any food buildup to restore the easy release surface. For deep cleaning first soak in hot soapy water then scrub with a non-abrasive, non-metal scrubber. Bar Keepers Friend may be used for tough buildup.
5. After deep cleaning, wipe once with a small amount of oil prior to use.
6. Metal utensils may be used such as a metal spatula.

PSTK Permanent Release Finish

- Permanent Easy Release Finish
- No Chipping, No Flaking, No Peeling
- No Pre-Seasoning
- No Comparison**

Pre-Seasoned Tuff-Kote® Only From LloydPans

USA Manufacturer

Every step of the manufacturing and coating process is conducted entirely in-house at our facility in Spokane Valley, Washington.
